

THOMAS MORE | UNIVERSITY OF APPLIED SCIENCES

Welcome to Belgium, **welcome to Thomas More**

Where it **Happens**

Thomas More is a leading university of applied sciences in Flanders, Belgium. The English-taught programmes attract students from all over the world, giving the campuses and programmes a vibrant international character.

As a pioneer in the 'learning by doing' method, we offer students tailored learning through our innovative labs, hands-on course methodology and real-world project opportunities.

Over 250 researchers conduct outstanding practice-oriented research with impact for businesses and society. We are a strategic partner for numerous large and small companies, institutions and organisations in the wider region and far beyond.

Discover more in our videozone!

> Located in the heart of Europe between Brussels, Amsterdam, Paris and London.

Proud member of **HEROES University Alliance**

Thomas More is part of a European University Alliance that brings together nine practice-oriented higher education institutions across Europe.

Today, exploring new horizons has never been easier: discovering new countries, cultures and perspectives within the trusted environment of our partner institutions. HEROES inspires students, teachers and professionals to take action and make a difference, wherever they choose to grow.

Through international projects, exchanges, internships and joint learning opportunities, HEROES opens doors to new cultures, ideas and perspectives. It connects local expertise with global challenges, helping students grow as professionals and as people.

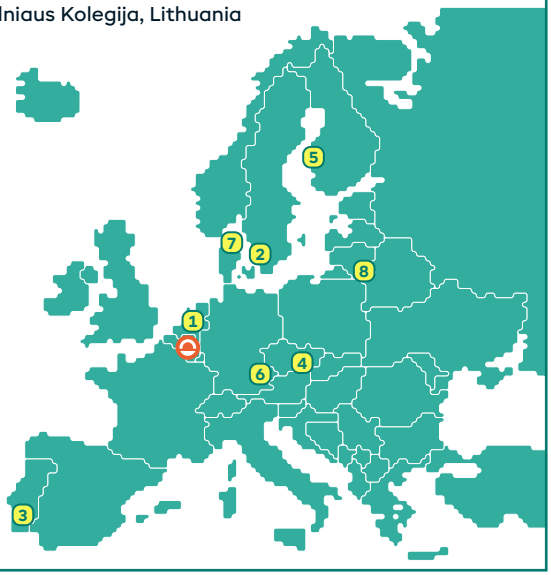

Together, the alliance creates a network where education, research and innovation strengthen resilient communities, businesses and nature across Europe.

Exchange Programmes

Discover more than 40 English-taught exchange programmes! We welcome exchange students from our partner universities around the globe to study or do an internship.

Thomas More promotes the 'spread your wings' model, by which every student acquires international-intercultural competences and sharpens their international professional knowledge. This model is aligned with our partner's vision on internationalisation to find the best type of mobilities that will help achieve our common goals.

Thomas More is a comprehensive university of applied sciences that offers a wide range of disciplines with a broad global network.

Next to faculty-led international partnerships, Thomas More values partnerships at an institutional level, which boost **multidisciplinarity in teaching**.

Enhancing the scope and depth of learning, multidisciplinarity brings forth many opportunities. Thomas More offers a multidisciplinary semester in English as an exchange programme open to students of various disciplines.

We invite our international partners to become part of the Thomas More international ecosystem and enjoy the benefits of **our inclusive and multidisciplinary community**.

Internationalisation@home

- Flow to a (professional) master abroad

Areas of expertise!

We conduct research in four multidisciplinary areas of expertise to address the challenges businesses, organisations, governments and society face, and to provide them with innovative solutions. Thomas More has seven centres of expertise, each of which focus on a specific field.

Research

At Thomas More, we engage in practice-oriented scientific research. Our team of 250 researchers integrates scientific expertise with practical knowledge and experience to develop evidence-based solutions and innovations for the most pressing societal challenges. Our research is inherently multidisciplinary, drawing upon knowledge from various domains and disciplines.

Creating **impact and innovation** for and with professionals and the wider society

Contributing to a worldwide **culture of knowledge**

Transfer of new knowledge to educational programmes, workshops, toolkits and literature, educating thousands of students each year to be state-of-the-art professionals

Focus and a selection of our research topics

Caring and inclusive society

- Technology for (mental) health and care
- Inclusion, prevention and community based care
